FIT&HEALTHY CATALOGUE 2023

Innovative sports & therapeutic equipment for your health

Dear customers and sports enthusiasts,

Who hasn't experienced this?

Tired, powerless, exhausted?

Exercise is the elixir of life and a source of strength in all its facets, and yet we are quick to neglect this "miracle plant" for body and mind.

That's why at Erzi we are looking for new, complementary or even sometimes forgotten products that convey the joy of movement.

And so on the following pages you will find refined and high-quality products for sport, exercise and therapy.

Let yourself be moved.

Safety

is our prime consideration

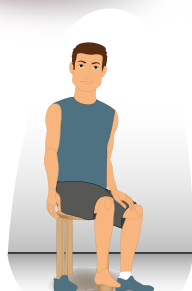

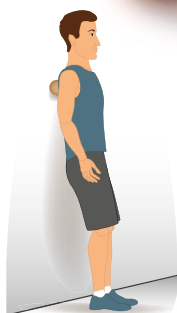

▶ Trainings Board medium on p. 14

All Erzi products undergo consistent and regular testing along with official certification procedures. For double security: In addition to stringent in-house quality control measures, constant testing is carried out by external independent institutes and public bodies. This comprehensive quality management policy is documented by our seal of tested approval.

1

1 Woodroller Ball

Ø: 8,0 cm
weight: 220 g
material: beech, waxed

To produce that intensive rounding-off effect, it is advisable to work with the Woodroller Ball at the end of a revitalisation session. It can be used on all parts of the body for removing tension as well as for loosening tackiness of the fascia connective tissue. Depending on the desired intensity, the Woodroller Ball is usable as a classical massager or (if applying one's own bodily weight) in a standing posture against a wall or in a reclining position down on the floor.

47000

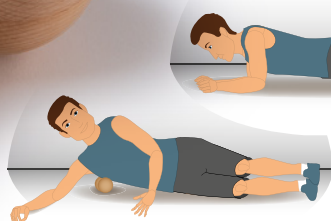

2 Woodroller Bone

length: 19,5 cm Ø: 8,0 cm
weight: 470 g
material: beech, waxed
distance pressure point: 11,5 cm

The Erzi Woodroller Bone is specially designed for fascia-tissue training involving the back muscles. On account of its shape and the exceptional hardness of the wood, the lower muscles of the back can be reached with ease. Also ideal for applying to the thighs and calves.

47005

2

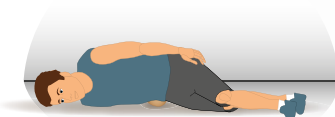

INFO

Depending on the desired intensity, the Woodroller Bone can be used in a standing posture against a wall or in a reclining position down on the floor.

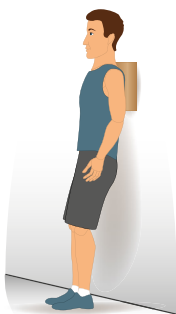

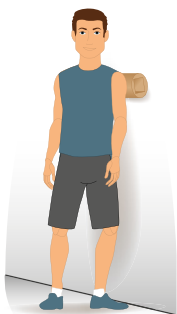

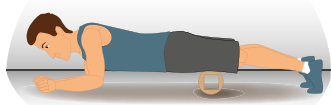

The Erzi Woodroller Cone is ideal for performing a whole variety of different exercises aimed at producing an enhanced depth penetration effect. It serves to free the groin, chest and posterior muscles from strain and tension. In addition, the Woodroller Cone is a great tool for targeted trigger-point massage apart from being smooth to handle.

3 Woodroller Cone

length: 10,5 cm Ø: 6,5 cm
weight: 200 g
material: beech, waxed

47016

Woodrolls – For constructive activation and mobility workouts

These classical fascia rolls cater for enjoyable soothing massage applications as well as for constructive activation and mobility workouts. It is the use of natural beech incorporating inherent warmth along with stability and high quality that makes our fascia rolls so incomparable.

Nothing could be better for sports-event training, daily back-training exercises or just for sheer relaxation brought about by a thorough self-massage. The natural state of the material makes fascia training a very special experience indeed!

Erzi Fascia Woodrolls are the perfect thing for stimulating and relaxing the muscles before engaging in any strenuous activity or purely and simply for re-vitalisation. On account of their large-dimensioned bearing surface and the gentle pressure exerted, the rolls are ideal for users preparing for other Erzi Woodroll shapes producing a greater depth penetration effect.

47020

4 Woodroll classic

length:.....30,0 cm Ø:.....14,5 cm

Pure Relaxation with our Woodblade Massage Tool

The five differently rounded edges of our Woodblade allow you to specifically release tense fasciae and relax your muscles. Especially the convex 9 cm edge is a highlight of the tool, as it can specifically massage pressure points. Due to the high-quality beech wood, the Woodblade feels comfortable in the hand and thus prevents the therapist's finger joints from getting tired quickly. Wood has a natural antibacterial effect, which keeps the tool hygienic even with frequent use. With a height of only 1.5 cm, it is also pleasantly compact and easy to store. Give yourself and your body a break and relax with our Woodblade Massagetool!

4 Woodroll Trigger Set, nature

length:..... 6 / 5 cm Ø:..... 6,3 / 5,3 cm

weight:..... 150 g

content: 2 pieces | material: beech, laquered

The trigger-point massage is a “help to self-help” in resolving tension that builds up when faced with everyday situations, in the office, during travel or simply seated at home on the sofa. Areas of pain can be triggered while seated, standing or lying down. Prolonged localised pressure can help relieve pain if applied regularly. Through regular use of the Erzi Woodroller over a longer period of time you will discover the positive impact this has on your physical well-being along with improvement of many functional problems.

Erzi Therapy Sets

... from therapists - for therapists

Our therapy sets are made exclusively of natural wood - best quality, made in Germany and 100% natural product. Already with the first applications, the muscles are relaxed, adhesions in fascia and connective tissue are loosened and the blood circulation is promoted. High effectiveness is achieved even with low pressure. When used in the therapy area, the therapist's hands & joints are relieved and protected. The wooden rollers are handcrafted and refined. Our sets are sweat- & saliva-proof and comply with DIN 53160 as well as the toy guideline EN 71.3.

The modular system of our therapy sets is designed for people of different sizes and various manual, physiotherapeutic treatment techniques - ONE set for many applications.

1 Slackspot Thera

length:..... 155,5 cm width:..... 18 cm
height:..... 21 cm Ø:..... -
weight:..... 11 kg
content: 1 slackspot, mounting set, instructions
material: birch plywood, laquered
delivery: mounted
No toy! Sports good!

The Slackspot provides support for those performing balancing and coordination exercises for the first time as a means of gaining safe-walking confidence applied to everyday situations. The low balancing height caters for safe balance without assistance, no means of fall protection being necessary. The adjustable belt tension and stopper feet fitted to the underside are just two of the many features distinguishing this fine product. Slackspot needs no additional anchorage and is thus capable of being used in many different locations.

**LOAD
CAPACITY
UP TO
150 kg**

INFO

Use of the Slackspot as a training and therapy device lends support to sensorimotor training functions, whilst also improving coordination and sense of balance.

low balancing height

3 Balancing Board Thera

length: 73 cm width: 47 cm
 height: 7,3 cm Ø: -
 weight: 4,79 kg

content: 1 game board, 1 wooden ball

material: birch plywood, laquered

Warning! Not suitable for children under 36 months. Choking and suffocation hazard! Contains small parts and balls.

The Balancing Board Thera is fun to play with and combines enjoyment with bodily exercise. Anti-slip treads act as a support to adults whilst they direct the balls along the track to the finish.

The flexible anti-slip seesaw base fitted to the underside of the balancing board caters for appropriate safety.

The integrated handle is useful for carrying the board when moving from one place to another.

1 Fitness Box

length: 60 cm width: 49 cm
height: 40 cm Ø: -
weight: 10,2 kg
content: 1 piece; instructions
material: birch plywood
delivery: disassembled

1 Fitness Box

Sturdily designed, the Erzi Fitness Box facilitates box jumps for strengthening the thighs and buttocks as well as dips and press-ups at 3 different levels (60, 49 and 40 cm), thus catering for highly efficient and intense workout. Sustained improvement of bounce is yet another plus point in addition to enhanced speed and mobility. This makes the Erzi Fitness Box a multifunctional all-rounder for training in the studio or at home.

2 Core Rollers

length:..... 21,3 cm width:..... 21,3 cm
 height:..... 7,5 cm Ø:.....
 weight:..... 1,36 kg
 content: 2 pieces; instructions
 material: birch plywood, laquered
 delivery: mounted

47094

Core Roller

Erzi Core Rollers mark a spectacular advancement in classical abdominal trainers. The rollers cater for movement in all directions. Cornering and rotational exercises serve to increase efficiency combined with added training fun. Erzi Core Rollers are usable with either the hands or feet, thus broadening the spectrum of exercises. These small yet handy tools are indispensable to all fitness gurus for an effective body workout.

2

- complex 3D-movement
- with hands & feet

3

3 Core Bike

length:..... 75,5 cm width:..... 22,5 cm
 height:..... 9,5 cm Ø:.....
 weight:..... 1,47 kg
 content: 1 piece; instructions
 material: birch plywood; beech
 delivery: mounted

Core Bike

Specially conceived for mountain-biking and cycling sports, this core trainer is designed with full handlebar width, thus simulating perfect stabilisation training for downhill and mountain-bike disciplines. Rollers mounted to the underside facilitate flexibility of movement in all directions. Extra fun and training efficiency is derived from cornering and rotational exercises.

**INDOOR
TRAINING
for your
OUTDOOR
FUN**

Erzi training boards are the perfect thing for exercising strength in the fingers, arms and upper body. Combined classical grip and peg board features cater for countless grip and pull-up sequences. The two boards are fitted with metal eyelets. Here, attached band loops can be used purely and simply as footholds. This versatile combination makes our training boards ideally suited for the needs of both novices and aces.

47061

1 Trainings Board medium

length: 66 cm width: 17 cm
 high: 32 cm Ø: -
 weight: 5,1 kg
 content: trainings board incl. 2 metal eyelets, 2 wooden grips (140 x Ø 30 mm)
 material: birch plywood | delivery: mounted

Bigger and smaller strips and a few plug holes make this board a standard piece of equipment for ambitious power athletes and climbing enthusiasts. Simply mounted over a doorframe at home, dozens of different climbing techniques can be exercised daily as the user passes by.

47060

2 Trainings Board large

length: 95 cm width: 17 cm
 high: 38 cm Ø: -
 weight: 12,6 kg
 content: trainings board incl. 2 metal eyelets, 2 metal grips (140 x Ø 30 mm)
 material: birch plywood | delivery: mounted

This is the very ultimate in training boards – no matter whether used for classical keep-fit or climbing techniques. A good selection of grips, hollows and slopes arranged with different depths, angles and planes provides immeasurable scope for obtaining mounting and climbing variety. This board also combines classical climbing grips with the hanging facilities provided by a pegboard.

47092

3 Campus Balls

length cord: 100 cm width: -
 height: 6,7 cm Ø: 8,5 cm
 weight: 440 g
 content: 2 pieces
 material: beech; cord
 delivery: disassembled

Used in conjunction with pull-ups, hanging and/or blocking techniques, Erzi training balls provide excellent facilities for training and developing the forearm muscles, while substantially intensifying the gripping and pinching power of the hands and fingers. Applying the extremely durable cord, the balls can be attached quickly and with ease e.g. to our training boards. Whether you're at home or out and about, you can be sure to find a use for the Erzi Campus Balls almost anywhere you go!

47093

4 Campus Sticks

length cord: 100 cm width: -
 length stick: 20 cm Ø: 4 cm
 weight: 440 g
 content: 2 pieces
 material: beech; cord
 delivery: mounted

Combining Erzi training sticks with pull-ups, hanging and/or blocking techniques is an ideal way of engaging in targeted training exercises, whilst developing the forearm muscles or building up gripping and pinching power of the hands and fingers tremendously. By means of the heavy-duty cord, the grips are attachable both quickly and with ease e.g. to our training boards. Whether out and about or just at home, the sticks can be used virtually anywhere!

1

1 Campus Board

length: 90 cm width: 28 cm
 height: 7 cm Ø: -
 weight: 8,3 kg
 content: 1 Campus Board, 2 wooden handles, 6 campus rungs,
 12 screws & washers and 1 set of instructions; (climbing grips not
 included)
 material: birch plywood; beech | delivery: disassembled

**possibility to
mount your
own grips**

The Campus Board comprises one baseboard and six individually mountable rungs. The rungs can be screwed on easily at different angles. This enables users – even beginners – to get started without any difficulty at all, while catering for enormous finger strength. The standard M10 thread incorporated into the grip board also allows the user's own grips to be mounted to the Erzi Campus Board. In addition, two metal hooks are fitted to the underside to which various units of training equipment can be attached (e.g. Erzi Campus Balls or Campus Sticks).

In a nutshell: The Erzi Campus Board is the ideal appliance for a really good workout as well as for increasing gripping strength.

2 Climbing Ufo

length: 40 cm width: 30 cm
 height: 34,6 cm Ø: -
 weight: 8,36 kg
 content: 1 Climbing Ufo, mounting set, 1 set of instructions (without
 carabiner)
 material: birch plywood; beech | delivery: disassembled

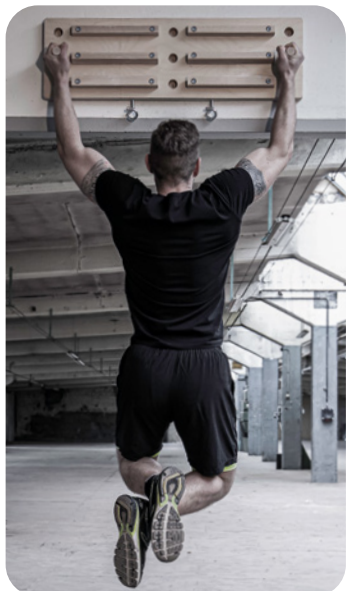

47065

INFO

The free-hanging construction promotes body tension, balance and strength endurance. The torso muscles are always completely challenged and the interaction of individual muscle groups is perfected. The unique training effects make the Climbing Ufo a must not only for climbing enthusiasts, but also in the fitness and strength area, endless variations are possible.

The Erzi Climbing Ufo is an absolute magnet for professional climbers and those who want to become one. Various holes, holds and slopes challenge you just as much as the space in between, which lets you practice crack climbing, among other things. The Climbing Ufo can be easily hung from the metal eyelets in two directions, but with the help of loops, carabiners, etc., there are a wide variety of hanging options.

3 Campus Rungs

length: 30 cm width: 3,5 cm
 high: 3,4 cm Ø:
 weight: 930 g
 content: 4 pieces
 material: beech

47091

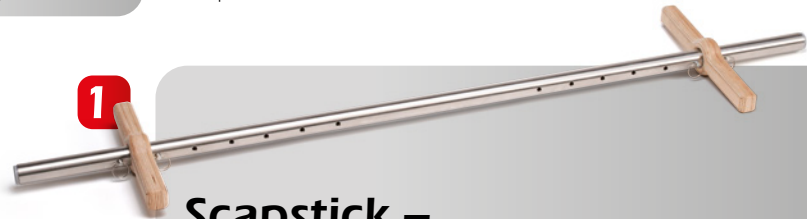

Erzi Campus Rungs are each provided with a positive undercut on one side, the other side being straight. Re-mounting the rung produces a downward-angle slope. This enables different grades of difficulty to be attained. Pre-drilled holes allow the rungs to be repositioned and are a standard feature on training equipment used by almost every professional climber. An ingeniously simple and effective way to complement any climber's training requirements!

▶ Stretching exercises

1 Shoulder Trainer Scapstick

length: 117 cm width: 27 cm
 height: - Ø (steel tube): 2,8 cm
 weight: 6,3 kg
 content: 1 bar, 2 handles, 4 fixing pins
 material: birch plywood with paint finish; stainless steel
 Delivered in single components for individual adjustment and adaptation.

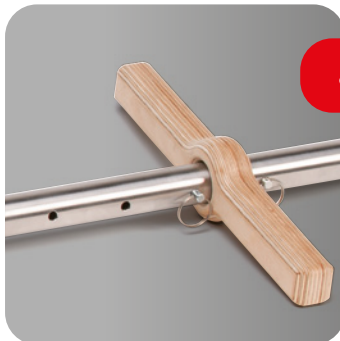

Scapstick – the Shoulder Trainer

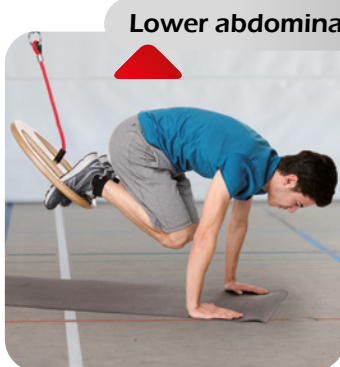

The Erzi Shoulder Trainer Scapstick is designed for exercising mobility of the shoulders.

It provides specifically targeted potential for expanding individual muscles, thus producing the desired therapeutic effect to counteract incorrect posture in the shoulder joints.

Movable handle mounts cater for a whole variety of different grip options and exercising motions, all conducive to shoulder mobility.

2 Sling Trainer Orbi

length(rope): 63 cm width: -
 height: 3 cm Ø: 50 cm
 weight: 2,6 kg
 material: birch plywood, laquered; plastic; metal
 delivery: mounted

A complete gym incorporated in a single piece of equipment.

This is an indispensable piece of equipment for training all major muscle groups geared to a whole number of different exercises. No matter whether it's the legs, arms, abdomen or back that are in need of exercise, good trunk stability and body tension are fully catered for. The Sling Trainer Orbi has a significantly positive impact on training the lower abdominal region and muscles, thus serving to counteract muscular weakness and backache.

▶ Training of side trunk

- Complex training exercises
- Quick to set up
- High quality standards

INFO

The Orbi is a resourceful training device accommodating the needs of up to two persons at a time with special emphasis on strengthening the muscular system of the abdomen and back.

Momentum

Therapy & training in perfect coordination!

3

3 Muscle-trainer Momentum XL

length:..... 107,5 cm width:..... 25/26,7 cm
height:..... 11,5/12,8 cm (measures without/with roll)
weight:..... 5,24 kg

content: 1 baseboard, 2 handles, 2 treads, 1 semi-cone, 1 roll
material: birch plywood, laquered, coloured laminated; no-slippering pad; silicone

A multifaceted functional-training and therapy device for exercising strength, balance and coordination applied to all groups of muscles.

The Erzi Momentum XL accesses you to potential training skills in a whole variety of different positions. These range from simple classical balancing exercises performed on one leg right through to targeted strength-training workouts involving the arms and legs, combined in each case with the back and abdomen muscles. Going for this unit means opting for variety, fun and highly effective training drills. The Erzi Momentum XL can be put to efficient use for both therapeutic and fitness functions. The use of interchangeable wooden inlays and balancing bases means that there is virtually no end to the potential opportunity for achieving maximum exercising results applying this versatile muscle-trainer.

4 Sensopath XL

length:..... 140 cm width:..... 28 cm
height:..... 2,26 cm Ø:..... -
weight:..... 2,21 kg

content: 9 feet with different materials and surfaces
material: birch plywood, laquered; beech, coloured laquered; polypropylene; polyamide; aluminium; cork; no-slippering pad

Size highest foot: 28 x 14 x 2,26 cm

Warning! Not suitable for children under 36 months. Strangulation hazard! Contains long string.

Nine foot mounts revealing different materials and surface structures constitute the broad spectrum of this Sensopath product line. Constantly changing stimuli such as warmth and cold, hard and soft or smooth and rough are sensed and learned. Promotion of balance, sense of touch and tactile perceptions are the main issues involved in this keep-fit trail, the setup of which can be linear, circular or varied. Suitable for all age groups. Use is recommended without socks.

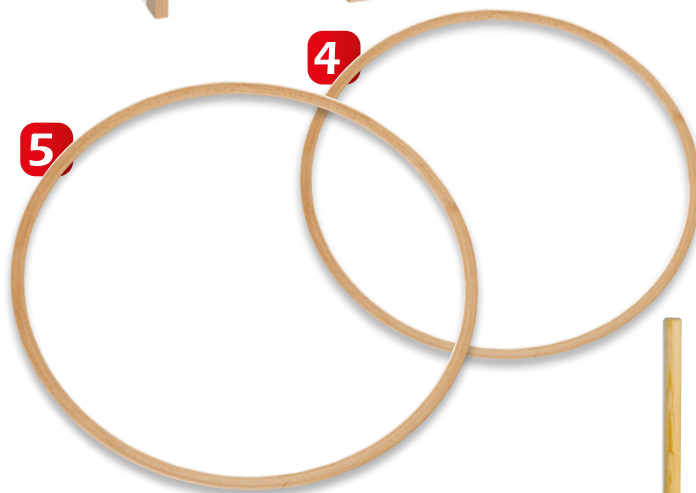

Step-by-step the Sensopath product line guides the user through the world of sensory and motor functions. A balancing act is the result, combined with a feeling of poise, a comparison of one's own physical abilities and a great deal more. One foot is deliberately placed in front of the other, stimulating a depth-sensory effect to weak feet. Resorting to a variety of different materials, surfaces and motor challenges serves to train bodily perceptions. All materials used are sweat- and saliva-proof, and are tested for toxics or harmful substances. Sensopath units are ideal foot trainers for games, sports and therapeutic applications.

height: 20,8 cm Ø: -
weight: 1,67 kg
content: 80 stacking ghosts in a bucket
material: beech, coloured laquered

42518

3 Learning Game Threading Blocks

length: 20,5 cm width: 20,5 cm
height: 14,5 cm Ø: -
weight: 1,32 kg
content: 90 wooden pieces for threading, 6 wooden threader with cord, 1 manual
material: beech, coloured laquered

INFO

With this educational game children consciously distinguish shapes and colors. Threading is a playful way to train fine motor skills and hand-eye coordination.

The lying eight is primarily used to promote concentration, the training of hand-eye coordination and the "integration" of the two hemispheres of the brain. The internal ball tracks can also positively influence motor exercises in the arm and shoulder area. The 2D and 3D concept for this product is very well illustrated by an enclosed exercise booklet.

45409

4 Lying Eight

length:..... 51,5 cm width:..... 20,0 cm
height:..... 1,8 cm Ø:..... -
weight:..... 640 g
content: 1 game board, 2 steel balls
material: birch plywood, laquered
Warning! Not suitable for children under 36 months. Choking hazard! Contains small balls.

42527

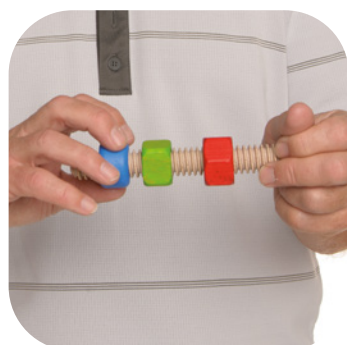

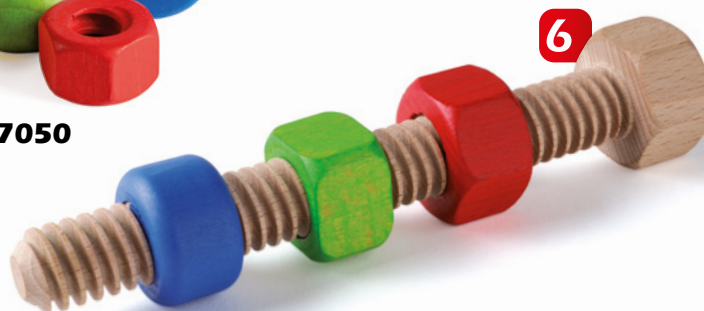

5 Screw-turning game Rainbow

height:..... 12 cm Ø:..... 4,1 cm
weight:..... 69 g
content: content: 6 pieces
material: beech, coloured laquered

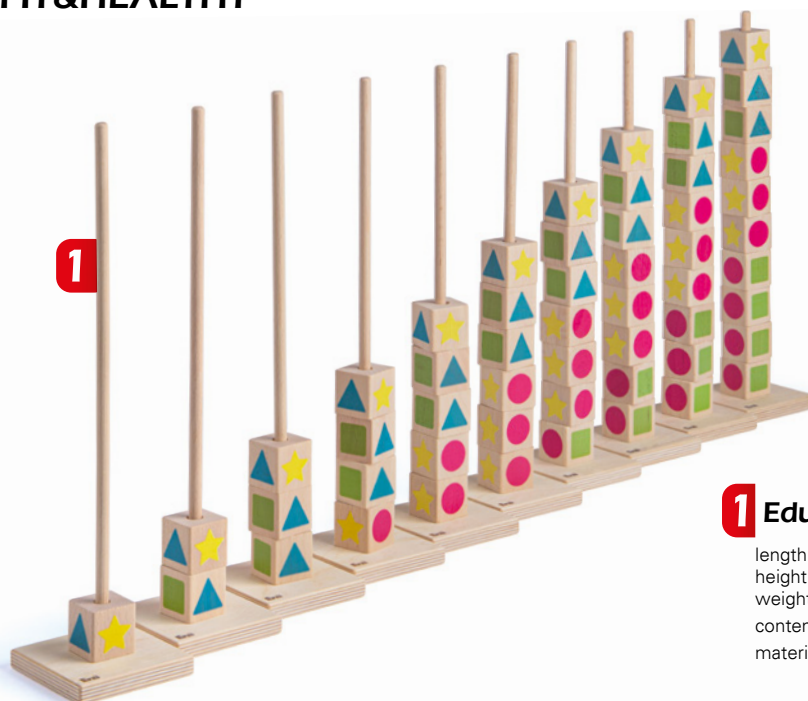

6 Therapy screw

length:..... 18 cm width:..... 3,5 cm
height:..... 3,5 cm Ø:..... -
weight:..... 160 g
content: 1 screw, 3 nuts
material: beech, nature and coloured laquered

47050

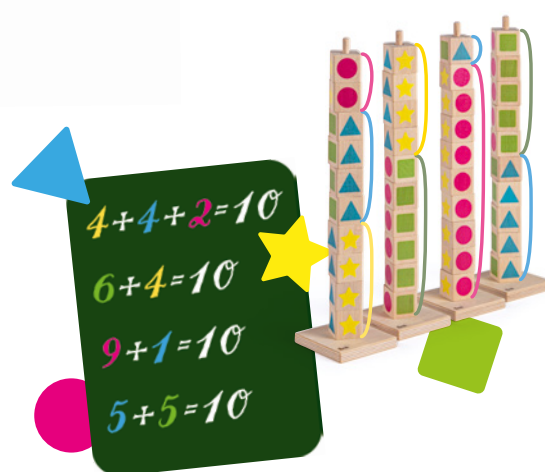

The therapy screw is a supporting aid for performing a whole variety of different therapeutic exercises involving the fingers, hands and forearm. The selection of different forms allows therapists to exercise several grades of difficulty in positioning the fingers, whilst the tricolour system facilitates naming the individual nuts. In contrast to a threaded rod, the screw provides patients with a better grip which in turn increases concentration on the hand involved in the movement. Simultaneous screwing of two or three nuts also presents a challenge to the development of motor skills.

1 Educational Game Counting Towers

length: 43 cm width: 31 cm
 height: 16 cm 1 pegboard: 8x8x33 cm
 weight: 1,75 kg
 content: 10 pegboards, 55 peg cubes
 material: birch plywood, nature; beech, nature and coloured printed

Our counting towers enable children of pre-school and primary school age to explore numbers through play. They help to develop an imagination for quantities. Likewise, they playfully – and simply – illustrate number decomposition, simple addition and subtraction, and the concepts of „greater than“ and „less than“. On the pegboards, numbers 1 to 10 can be explained with the cubes using four different coloured symbols (star – yellow, triangle – blue, square – green, circle – pink), Enabling the child's eye to quickly grasp and deal with small quantities. The clear symbolism also lets colour-blind children grasp the theme without barriers.

2 Educational Game Counting up to 10

length: 17,8 cm width: 11,8 cm
 height: 17,8 cm Ø:
 weight: 858 g
 content: 1 game board, 27 pieces (10x 1, 5x 2, 3x 3, 2x 4 & 5 each,

3

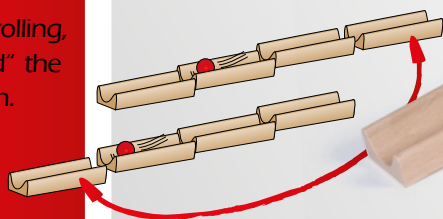

Our team game set FUN is a great collection of utensils for team games with fun guarantee. The enclosed solid ring block contains 12 game ideas for young and old.

Team games promote social competence and communication for a strong togetherness.

INFO

To keep the ball rolling, you have to „extend“ the track again and again.

4

This set of sturdy wooden ball tracks will transform a group into a whole team! When joining forces, all players work hand-in-hand to assemble a long track. The aim is to keep the wooden balls rolling progressively from one point to the next. This calls for pronounced skill and the powers of concentration to react quickly. It also requires constant interaction on the part of the players to prevent the balls from falling on to the floor. Different levels of difficulty are also possible by reducing the tracks. Alternatively players can compete in two opposing teams.

4 Team Ball Track

length:..... 44 cm width:..... 38 cm
height:..... 6 cm Ø:..... -
weight:..... 3,71 kg

content: 8 wooden ball tracks, 2 wooden balls, 1 carrying bag,
1 manual

5

This game can be played without much preparation by any number of children from 2 to 24. The Team Tower set caters for loads of fun both outdoors and indoors, while cultivating motor skills and coordination. Setting up and completing the tower is a team-minded and communicative activity.

Describing actions and situations within the group serves to promote individual speech development combined with endurance in attaining the set target. Each member of the team experiences an increasing feeling of self-awareness and self-confidence in playing the game.
